

$-(a*b/c + 5.2^3)*d;$

Assume all ASTnodes have a field called length with number of terms.

```

minus
  product
    sum
      product
        Identifier  a
        times
          Identifier  b
          div
            Identifier  c
            plus
              exp
                Decimal  5.2
                Integer  3
                times
                  Identifier  d

```
